Mrs. Cathy,

2213 Linda Lane ended up only having grease problems with their service line and won't require a defect letter/sketch. I talked with Bob and he asked if we could send grease letters out to the apartments there.

As for the spot repair done by collections, Jay just disconnected the connection made by Heller when the mainline was pipeburst back in 2009 to make sure the previous connection was not the problem. When we verified it was not our problem, the maintenance men snaked the line and Jay remade the connection.

I contacted the manager at the apartments and they have not had any problems with their service line since it was snaked. I told the manager if any plumbing work was conducted, they would need a plumber. He understood.

The open permit , is safe to close.

If you have any further questions, I'd be glad to help.

Thanks,

Paul Richards

Paul,

I have questions on the above address. We have an open permit. Jay said he went over to the address and unclogged grease from the line and did a very small spot repair. Should we have an inspection form for this? Jay also said that you were going to send them a defect letter, if so, please let me know so I can leave the permit open.

Thanks,

Cathy Reed
